

Louisville Ladder's **C.L.I.M.B. ACADEMY** teaches fundamental principles of using step ladders, extension ladders, rolling warehouse ladders, rolling tower scaffolding, and aluminum walkboards. In addition to **C.L.I.M.B. ACADEMY** our customers benefit from free ladder condition assessments and ladder use audits. Several of our customers have saved thousands of dollars voiding OSHA fines and ladder-related accidents.

**150,000 people** are involved in a ladder-related accident each year

**\$80,000 USD** — the average full cost of an accident

**CHOOSE** the right equipment

**LOOK** for damaged or missing parts

**IMPLEMENT** a safe setup routine

**MOVE** safely using three points of contact

**BE** a climbing safety expert; NOT a statistic!

## Significant Accident Causes

As reported on Table 27 of American National Standard

### IMPROPER SELECTION

- Ladder too short
- Wrong style: Extension Ladder vs. Stepladder, etc.

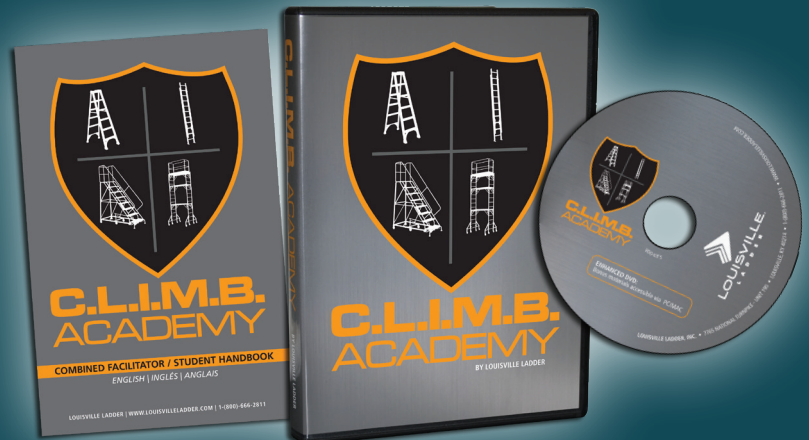

### IMPROPER SETUP

- Uneven or Unstable ground
- Too shallow set-up angle

### INCORRECT USE

- Standing above highest standing level
- Reaching too far
